**About us**:-

At Lenskills, we make aware people about the various opportunities in the field of technology. Our aim is to get the youth interested in the technical skills. Our educated youth have a lack of skills be it technical or behavioural; hence we have formed a community to make people richer in skills.

We provide competitive and practical training in the field of computer science.
Our talented team develops software solutions in different domains of computer science technologies like Data Science, IoT, AI, Full-stack web development, etc. for our trusted clients.
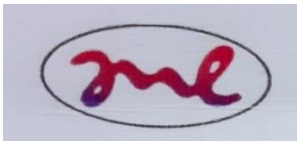

## Our Services:-

**Our Sponosors**

**Their logos: -**

**Our Client: -**

**Examination Cell of Rama University** – Our team has successfully developed a Question Generator.

**Brain** - An automated health system.

**Taxationer** - We are developing a website for them.

**Mievo Technologies Pvt Ltd** - We are working on two IoT projects: -

a) RTD Temperature Logger.
b) Low power nrf52840 dongle.

**Requirement: -**

- We need Sponsorship of Rama University.

- We need legal advice and financial support to register our community as a start-up company.

- Our community wants to conduct a Hackathon on "IoT and Automation" on behalf of LenSkills in our Rama Campus, Kanpur, where we are inviting a student from a different college.

- We need news and radio channel support to spread our LenSkills moto to others.

- We are going to colleges and schools in January to aware of modern technologies. So, to fulfill the requirement, we have to buy a projector, rewards, and posters, etc. There is a need of *Rs 21000*.
